Declass Review by NGA.

25X1 Attention:

[Redacted]

Subject: Light Table with Mensuration Scanning Stage

Gentlemen:

25X1 On 17 March 1966 (Ref: LJC 414) a proposal was submitted to your office wherein [Redacted] would furnish "Light Table with Mensuration Scanning Stage" in quantities of one (1) each and three (3) each.

During a conversation with Mr. Ed D. of your organization, we were requested to advise your office as to any financial impact which might occur as a result of the following technical changes to the Statement of Work.

1. The mensuration mechanism accuracy of ± 0.001 inches per inch as specified in Paragraph 2.3 of the proposal is to be changed to an accuracy of ± 0.0001 ft. per inch.

2. The digital counters providing the X & Y readout are to be made resettable and yet still provide minimum obstruction to film overhanging the light table in the counter area.

3. The stage travel is $\pm 1-1/2$ inches (total travel of 3 inches in X and in Y).

4. The microscope support slide travel be increased to 4 inches of travel instead of the 3 inches proposed.

Transmitted herewith are  Cost Breakdown worksheets for a "Light Table with Mensuration Scanning Stage" as follows:

25X1

Quantity

1

3

25X1

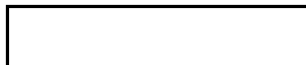

Please be advised that the financial impact for the incorporation of the above mentioned technical areas is minimal, and actually the increase in total price for both quantities is basically due to a rate change here  You will note on our previous proposal that Engineering Overhead was quoted at 130% and G&A at 13%. Effective July 1966 the new approved Engineering Overhead is 140% and G&A is now 14.5%.

25X1

Except for the financial increase resulting from rate changes and additional technical effort required, all other aspects of our previous proposal to your office are still valid.

We trust that this revised proposal is now complete for your final evaluation, and we look forward to receipt of your authorization to proceed at the earliest possible date.

Very truly yours,

25X1
